4. The Global Call for Peace

1 Thessalonians 5:3

The West does not understand Islam. It is more than a religion. It is a complex ideology that blends religious, political, economic, and culture ideals that reflect the teachings of their 7th century prophet, Muhammed.

No one understand Islam like Israelis.

Dr. Mordechai Kedar argues that the West consistently fails to understand Islam due to a fundamental cultural and ideological disconnect. He believes that Western policymakers often assume secularism and the separation of religion and state are universal norms. However, in the Islamic world, religion deeply impacts politics, law, and daily life. This misunderstanding leads to flawed policies in the thinking of Western leaders.

The world is being deceived into believing that peace with Islam is possible. Islam has as its foundational tenet global dominance. The word “Islam” means “submission.” It is their ultimate goal to submit the entire world to their god and its ideology contained in the laws of the Koran. They have demonstrated for 14 centuries that they are willing to die for their faith and shed the blood of non-Muslims in this process. At the center of their hatred is Israel.
